# Fire Chief's Report

April-2020

## Summary

The Bristol Fire Department responded to 148 calls for service with a total of 283 responses during the month of April. This is a difference of 13 less calls from this time period last year. Calls are down slightly due to the Covid-19 restrictions City wide. No surveys were completed during the month of April due to Covid-19 restrictions.

## Personnel

Ryan Chapin, our newest firefighter, started Monday April 13<sup>th</sup> with a small swearing in ceremony at City Hall with all attendees adhering to Covid-19 PPE guidelines. Ryan started at Station 4 where he will remain until Covid-19 restrictions are lifted. After that he will be able to do his station rotations.

## Employee Recognition

Bristol Fire department personnel participated in 16 Drive by Birthday parades throughout the month. These have been well received and appreciated by all involved. We have received many thank you messages via email and Facebook messages. Pictures and videos have been posted on the Bristol Fire Department's Facebook page.

Fire Marshall elect Lambert and Fire Inspector Buzzell successfully completed the Fire Investigation practical exam on Wednesday April 1<sup>st</sup>. They also successfully completed the courtroom practical evaluation on Monday April 13<sup>th</sup>. They are awaiting news from the State as to when the Code class will be held. We submitted paperwork to the State Fire Marshal's Office to extend Acting Fire Marshal David VanWie's status as Acting Fire Marshal as this needs to be filed every six months.

Firefighter Adam Hayes was once again the center of a video aimed at fire safety during the Covid-19 isolation. Firefighter Hayes was joined by Captain Simard and Firefighter Yudelson. The video was filmed at Station 2 and posted on the Bristol Fire Department's Facebook page. The video received many favorable comments and provided some light hearted entertainment. A job well done by Engine 2 B shift crew!

## Fire Stations/Facilities

On Monday April 20<sup>th</sup> Captain Jeff Neumann and Captain James Plaster filmed all parts of Headquarters that will be part of the renovation project. They were remotely directed by Roger Rousseau who was facilitating questions from contractors. This video was made available to contractors to enable them to virtually tour HQ and submit bids. Another example of thinking outside the box during the Covid-19 restrictions. Job well done Captains!

## Apparatus

Tower 2 received the most notable attention and was sent out for rear outrigger repair and maintenance.

## Miscellaneous

A request for a sick time report was made in the past:

The following compares the 4<sup>th</sup> quarter of 2019 and the first quarter of 2020:

	2019	2020	Change	% Change
Short term sick leave (< 4 shifts)	947 hrs	998 hrs	+ 51 hrs	+ 0.5%
Long term sick leave (> 3 shifts)	2,304 hrs	1,444 hrs	- 860 hrs	- 37%
Total sick leave (long + short)	3,251 hrs	2,442 hrs	- 809 hrs	- 24%

Short term sick leave increased a very minimal amount, while long term sick leave has significantly decreased. Overall sick leave has also significantly decreased. It will be interesting to review sick leave, overall, related to the Covid-19 timeframe.

One call of note was the fire at 400 North Main Street, Ingraham Manor, on Sunday April 19<sup>th</sup> on B Shift. Crews responded for a report of an alarm sounding. Upon investigating crews were faced with a moderate smoke condition in the basement caused by a small fire located in one of the basement storage rooms. The fire was contained by the sprinkler system and extinguished by fire department members. Fortunately, the staff was quick acting and secured the patients in place and closed doorways, containing the smoke to the basement. This call is a perfect example of a sprinkler system operating as designed, properly trained staff, and aggressive efforts by the fire department. No patients were effected, one employee was transported to the hospital for evaluation, and there were no firefighter injuries.

Covid-19 continues to present challenges to the way the Bristol Fire Department operates. Due to the dedication of the members we have been able to adapt to these challenges while keeping both ourselves and the public we are sworn to serve safe.

Respectfully submitted:

Chief Mark Flynn

**Monthly Report**  
**April, 2020**

**Summary**

Despite all company surveys temporarily on hold, Station 2 personnel have been conducting drive by exterior surveys of area businesses. We are also checking area hydrants and vacant properties. All training is now being done in house so we are improvising and keeping all training at the company level. All shifts have completed their assignments and the hard work put in by all is much appreciated. Station 2 personnel responded to 32 calls for service in the month of April.

**Personnel**

There were no changes to the personnel at Station 2 during the month of April due to the Covid-19 restrictions.

**Miscellaneous**

It is nice to see a community coming together to help one another through this pandemic. I would like to thank all those who have put up hearts and well wishes throughout the city. ## MONTHLY TRAINING REPORT

April 2020

Training for the month of April continued to be interrupted by the Covid-19 virus. With the isolation and compartmentation of the department to limit close contact of personnel, multi-company training has been suspended at this time per Fire Chief M. Flynn and myself. In an effort to continue training company level training initiatives were sent out this month for Bristol Fire department personnel.

The annual fire apparatus driver / operator check-off program started during the month. Each firefighter was issued a driver check-off sheet to complete for each apparatus they operate. This annual recertification on operation of apparatus, location of equipment and pump operation is required by each driver operator per apparatus they intend to be qualified as driver / operator of. Firefighters are required to drive all apparatus located at their respective stations and appropriate spare apparatus.

Firehouse Software training and updates were completed this month for New administrative assistant L. Wilson. Training on Firehouse scheduling and payroll integration into the Munis payroll system was completed in an effort to streamline and increase accuracy in generation of the payroll report. Additionally the four Deputy Chiefs were given training on Firehouse software for creating a daily activity and scheduling console activity reporting for payroll integration. This function allows the approved duty roster to migrate into a report assisting with the payroll function. Lastly in Firehouse Software a federally required study for Covid-19 incidents and equipment used was installed under the National Fire Incident Reporting Systems tab. All Bristol Fire department officers were training on the proper completion of this federal survey. These results are sent into the State of Connecticut Fire Marshal's office with the NFIRS reporting monthly.

Personnel at station 2 completed company level rope and hardware rigging training during the month. Some of the topics that were reviewed were basic ropes and knots, change of direction pulley, MPD, patient packaging and rescue harness.

I responded to 5 incidents during the month as safety officer.

Please be safe, wash your hands and practice appropriate safety measures while we successfully deal with Covid-19.

**Board of Finance Agenda Request Form**

**Reason for request:**

Fire Department would like to transfer out \$10,000.00 From Professional Fees (0012211-531000) and allocate the funds to the accounts listed below. These funds will not be utilized in Professional Fees as all training/seminars have been canceled due to the virus. The primary reason for the transfer is to cover anticipated overages in the accounts listed below. Repairs & Maintenance and Maintenance supplies need to be increased due to the additional spending for COVID-19. As for moving funds from Professional fees to Natural Gas account, MV Parts and Loose Equipment is to reflect what's more in line with actual costs incurred. Tower 2 and Engine 3 had significant repairs such as the outrigger needed maintenance and the injectors where needed. These were very costly repairs.

Reason for request:

Fire Department would like to transfer out \$1,500.00 From Program Supplies (0012211-561800) and allocate the funds to the Capital Outlay account for the purchase of a washer and dryer for Engine 2.

Please note that Engine 2 is the only station that does NOT have a washer/dryer. It is a health and safety issue as when the fire fighters / Lieutenant or the Captains return from a scene, they will be able to decontaminant their station uniform immediately at the station rather than bring the items home and cross containment others.
