

**Engine 3
April
Monthly Report
2021**

Summary

This month Engine 3 responded to 35 incidents of various types, including 2 first due structure fires. The first being a detached garage ignited by ill-used fireworks. The second fire was a basement fire in a house with a hoarding condition. Due to the better weather we have had more opportunity to orient our newer members to the target hazards in our area.

Personnel

With many of our newer members rotating through Station 3 I feel it needs to be mentioned how eager and willing our new firefighters are. I have been impressed with their competence and dedication to their on the job learning.

Apparatus/Equipment

The Equipment Technician has finally determined the whistling noise emanating from the engine compartment is an issue with the turbo and will be addressed soon.

Fire Stations/Facilities

We had a consultant evaluate the AC system and are awaiting the results of their determination.

Miscellaneous

Respectfully submitted,
David Butkus, Captain
