

# Engine 4 Monthly Report April 2021

## Summary

Engine 4 responded to 48 calls for service during the month of April. The crews participated in several company level trainings with the Tower on stabilization and extrication from a vehicle on its side. It was a great opportunity for the crews of Engine 4 to be able to use our new E-Draulic tools. Thanks to Captain Plaster for leading several of our training evolutions.

## Personnel

On the 21<sup>st</sup> Engine 4 responded to a basement fire on Duncan St. After securing a water source for the attack Engine, the crew went to work trying to resuscitate several cats that had been removed. A great effort by LT McKerney and his crew FF. Robotham and FF. Higley

## Apparatus/Equipment

Nothing to report

## Fire Stations/Facilities

Several repairs took place at Engine 4 this month. Air temp worked on our hot water system after it was identified that the hot water mixing valve was malfunctioning. Public works was quick to respond and get them on location. A temporary fix was made until the new part could be ordered.

Northeast Garage Company made several small repairs to the garages doors, outstanding quality of work from their crews.

The parts came in that Public works was waiting on to make the repairs to one of our showers, the repair was quickly executed. Thank you to David and his crews.

## Miscellaneous

On the 29<sup>th</sup> NBC was at Engine 4 to interview Mr. Kelly. The Station and Engine served as a back drop to the interview and looked sharp.

Respectfully submitted,

**Todd Correll**
