

# Engine 4 Monthly Report May 2021

## Summary

Engine 4 responded to 64 calls for service during May. As Covid restrictions are slowly being lifted Engine 4 is starting to build back into our routine of company surveys.

## Personnel

The B shift consisting of FF. Rehberg and FF. Rossi is still operating without a regular officer as LT Defour is still deployed. I am very pleased these two have done a great job working with the overtime Officers to keep operations moving, staying up on spring clean-ups and hose testing. Thank you to them both for their efforts.

On the 2nd Engine 4's crew, Capt. Plaster, FF. Spatcowski and FF. Chapin responded to an accident with entrapment. The crew operated quickly to remove the victim and start CPR. Engine 4's Automatic External defibrillator was used. Unfortunately, the victim's outcome was not what we would have hoped, but the proficiency and professionalism of the crew are noteworthy.

## Apparatus/Equipment

The AED was called into service this month and new pads were ordered and delivered.

## Fire Stations/Facilities

Offshore Construction was down at Engine 4 on the 10th to do an annual inspection of the roof. All came back satisfactory. Public works were out this month to change out our air handling filters. Also, a thank you to the IT department for a quick response to some scanner issues we had at Engine 4.

## Miscellaneous

Engine 4 over the last few months has had the pleasure to help out at the Farmers to Families food share. They have come to an end on Saturdays and will be changing to Thursdays. I wanted to take this opportunity to thank all the members of Engine 4 for participating in this project. It serves as a good reminder to all members that helping people does not always have to be in grandiose ways, small acts can go a long way to improving people's lives.

Respectfully submitted,

Todd Correll

Todd Correll, Captain
