

# Engine 4 Monthly Report January 2021

## **Summary**

Engine 4 responded to 69 calls during the month of January.

## **Personnel**

A great job by all the crews at a structure fire on the 23<sup>rd</sup> on Vines Road. Engine 4's crew made up of LT McKearney, FF Spatkowski and FF Quarto provided first aid to two cats removed by the Tower crew. Oxygen was administered care provided until they could be turned over to Animal control. This crew showed great care and compassion for our 4 legged citizens.

## **Apparatus/Equipment**

Engine 4 went out of service for a check engine light that indicated a problem with turbo sensor.

## **Fire Stations/Facilities**

Public works did a walk through with me to look over a few repairs and projects that have been outstanding. We determined what needs to be done soon and what can be done later. The main issue is a trip hazard located in the front of Station 4, Public works will be working with an outside contractor to lift the section of sidewalk that is causing the trip hazard.

The new key cards readers have been installed at Engine 4. The entrance keys have been issued to all members.

## **Miscellaneous**

Nothing to report

Respectfully submitted,

**Todd Correll**

Todd Correll, Captain
