

# Engine Company 2

## Monthly Report

### February, 2021

#### **Summary**

The amount of snow this month limited some survey opportunities. Station 2 personnel completed 8 surveys for the month of February. These are still restricted to mostly exterior information such as access points, FDC connections, utilities and Knox box locations. A walk through survey was done at West Bristol School on a Wednesday, which is a designated clean up and sanitization day. Only office and janitorial staff are in the building on these days. Station 2 personnel responded to 27 calls for service in the month of February.

#### **Personnel**

Probationary FF's A. Bentivengo and A. Quarto were assigned to Station 2 for the month of February for orientation. FF A. Dellaventura was moved to Station 4 for the month.

#### **Apparatus/Equipment**

There were no issues with Engine 2 in February. CP-17 continues to have mechanical issues when it gets used by the PD and returned with breakers left off in the vehicle. The battery drains down quickly and needs to be charged. FET Kelly was notified and has discussed the issue with the PD. The brush truck was in service as a plow vehicle often in February and had front brake issues. FET Kelly repaired the brakes and has ordered a new battery which died due to the load from the plow. One portable radio microphone was taken OOS and needed to be replaced. The HCN meter was taken to Station 5 for its semi-annual calibration.

#### **Fire Stations/Facilities**

Public works maintenance was on site to add some insulation in the boiler room. The snow plowing during the month has torn up more of the Matthews street ramp and Facilities manager David Oakes promises it will be replaced soon. The snow dislodged the gutter guard on the south side of the building and the roofers have been notified.

Respectfully submitted,  
Captain David J. Simard
