

**Engine 3
June
Monthly Report
2021**

Summary

The members at station 3 responded to 51 calls for service this month. Notable calls were, Sheridan Woods there was a boiler Issue that caused an evacuation of a unit and with the exceptionally high heat we saw an uptick in brush fires and wires down.

Personnel

New employees continue to rotate through. We continue to train these members on equipment and department procedures.

Apparatus/Equipment

A new floor jack and Sawzall were placed in service. The new Sawzall mirrors the one already in service on Tower 1. Ageing Engine 3 continues to have mechanical issues. The A/C system is leaking into the cab area and the KNOX box key holder needs to be replaced. Air pack E3-02 is out for repairs.

Fire Stations/Facilities

Bids to upgrade the A/C system are underway. A new bathroom faucet was installed by building maintenance. The Plymo Vent system was repaired. A broken motor cause this system to be down for a period of time.

Miscellaneous

Nothing this month.

Respectfully submitted,
Alan Rudolewicz, Lieutenant
